

Unlock **margin and efficiency** with Loop

The status quo is broken

- FAP is still **manual, fragmented**, and **a daily fire drill**
- Inconsistent data and systems → **poor visibility and missed savings**
- Finance and logistics teams are **burned out** trying to reconcile the mess
- **Overpayments, duplicate charges, and misallocations** add up fast

Loop is the AI-native **platform** that frees the team

Loop ingests messy documents from any system and carrier, automates every audit, allocation and payment workflow, to give us clean, accurate, actionable data—fast.

So the team can focus on what actually matters:

Margin improvement

Contract negotiations

Strategic planning

Real results—fast

- **2–7%+** transportation savings
- **95%+** reduction in manual work
- **3 month ROI**, live in weeks

What customers are saying

“We performed well over our initial ROI in the first year... The team enjoys Loop, it's been **a savior** here. We really appreciate it and look forward to the next year.” - Ed Zobel, Transportation Manager
